ABSTRACT

As a result of an intramural questionnaire developed by the National Intramural Sports Council (NISC) in May 1977, many participants requested that NISC sponsor a means of sharing ideas. This booklet has been compiled so that ideas pertaining to a specific area in intramurals can easily be located. The contents are divided into general categories including all intramural sports and related activities such as awards, funding, promotion, sports clubs, Title IX, tournaments, etc. In each section, the school, name of the contributor, the school address, and a brief description of the ideas are given. Many of the items are applicable to various levels in education. (PBS)

IN APPRECIATION

The Executive Committee of the National Intramural Sports Council recognizes, with appreciation, the time and effort which were devoted to the completion of the questionnaire released in May 1977.

In addition, the Committee is grateful for the ideas which were briefly described and willingly shared.

It is through the contribution of such professionals that intramurals will continue to enrich the lives of all students who participate.

The National Intramural Sports Council commends you for your interest and dedication toward this vital facet in the educational process of our children, young people and adults.

INTRODUCTION

An intramural questionnaire developed by the National Intramural Sports Council in May 1977, indicated that many professionals in the field were looking for new ideas, for changes in well established concepts, or were seeking ways and means of sharing self-developed ideas with other members of the Alliance.

The initial response was so gratifying that the Executive Committee began making immediate plans for developing more informative lines of communication. Because of past response to publications, it was agreed this text on new ideas should be published to share the specifics and enlist any member's interest in serving the needs of the hundreds of NISC members.

This text represents only part of a professional attitude that is beginning to sweep this country on sport, recreation and trends and concepts of play. People in charge of program development are more conscious of their positions and responsibility to the player, regardless of age or program emphasis, and the populace is likewise responding as increased recreational activities of all scope and dimension will confirm.

With this increased desire comes the publication of this text, designed to supplement the intramural person's library of information, afford new and different solutions to old ideas, and aid in the distribution of personal ideas available through the efforts of this Council. Within these pages is only a minute number of ideas that are constantly arising to challenge the facets of traditional thinking. As more and more ideas surface, more and more avenues of communication will be developed to assist you, the intramural professional.

HOW TO USE THIS PUBLICATION

As a result of the questionnaire released by the National Intramural Sports Council in May of 1977, many participants requested that NISC sponsor a means of sharing ideas. This booklet has been compiled so that ideas pertaining to a specific area in intramurals can easily be located.

The contents are divided into general categories. In each section the school, name of the contributor, the school address, and a brief description of the ideas are given.

Many of the items listed are applicable to various levels in education. We suggest, therefore, that you do not limit your review to the material which was submitted for your particular level.

For more detailed information than is given, we suggest that you contact the contributor. Where there is adjacency of schools it might be advisable to consider a phone call or visit.

Many of these ideas will be worthy of adoption. Perhaps they will prompt a change in structure, a motivational factor for increasing participation, a technique for better communication. If this publication is helpful to you it will prove beneficial to your students.
